

Natalia Gil, OTR/L

Bio

Although born in Poland and raised in MA/CT, I recently moved across the country from Oregon to Charlotte for this phenomenal opportunity at OC. I enjoy anything outdoors, travelling, and exploring new places. I am fluent in Polish and enjoy dog behavioral training and hiking mountains. We often catch people at their most vulnerable time in life after an injury that limits them from doing what they love most. With this deep training and knowledge required to be an upper extremity specialist, I want to be the reason you get back to the activities that make you feel most alive.
